

CARE AND MAINTENANCE FOR OUTDOOR PRODUCTS

Great conversations start here.™

TEAK MAINTENANCE

Remove any dirt or debris by hosing down the furniture with fresh cold water. Do not use high pressure hoses such as power washers. Doing so will only damage the teak and remove the existing finish. Dissolve one half cup of natural hand soap flakes in one gallon of water. This solution can be used in conjunction with a soft bristle brush to scrub the teak. After doing so, allow the solution to sit for 20 minutes without rinsing. The soap solution will help to protect the wood from staining as well as enhance the feel. Rinse with fresh water and allow to dry prior to use.

SYNTHETIC TEAK MAINTENANCE

Clean the synthetic teak with a mild chlorine-free soap and water then rinse. Do not use a rough and/or hard material to clean as this may cause scratches to the surface.

HDPE WEAVE MAINTENANCE

Clean the HDPE Weave with mild soap and water, hose to rinse. All-purpose cleaners or 1 part bleach to 2 part water solutions take care of extreme cleaning needs.

ROPE WEAVE MAINTENANCE

We recommend to simply wash it with mild soap and water solution, rinse and allow to dry thoroughly.

STAINLESS STEEL MAINTENANCE

Scratches in stainless can be buffed out with Scotch Brite pads or very fine grit sand paper (steel wool is not recommended due to the mild steel fibers contaminating the stainless surface therefore leaving rust colored stains). It is also recommended that the surface of the grain is followed in the same direction when buffing out scratches. Stainless although very resistant to corrosive environments do require periodic care and maintenance. Cleaning is necessary on all grades of stainless to prevent corrosive particles from gathering in the grain of the stainless surface. This results in a rust colored staining. Weekly cleaning with a good stainless cleaner will keep the surface free from corrosive particles. In environments where there is salt, chlorine or air pollution present, a weekly clean with water and liquid detergent followed by drying will keep the stainless surface free from contamination. If staining has occurred the surface can be cleaned with a nonabrasive kitchen cream cleanser and a light coat of a good quality protective spray such as Fluid Film can be applied.

RESYSTA® MAINTENANCE

We recommend to simply wash it with mild soap and water solution, rinse and dry thoroughly.

CARE AND MAINTENANCE FOR OUTDOOR PRODUCTS

Great conversations start here.™

SOLID ACRYLIC MAINTENANCE

GENERAL CLEANING - All table tops and fabricated sheet goods can be cleaned by using soap and water. Apply soap and water with a sponge or damp cloth, then towel dry to eliminate water spots.

PROTECTING THE SURFACE - All table tops and fabricated sheet goods are resistant to most household cleaners. Table tops and sheet goods should NOT be exposed to chemicals such as paint remover, metal cleaner, oven cleaner, acetone, nail polish remover, abrasive cleaner, and acid drain cleaner. Protect the finish with acrylic polish such as Counter-top Magic or furniture polish. All surfaces should NOT be exposed to direct heat. The use of heat mats underneath hot objects will avoid damage to your surface.

REPAIRS - Deep scratches and burns should be repaired by a professional fabricator; although little harm can be done by attempting minor repairs. Most supplies can be purchased at auto parts or paint stores.

MISTY GEMS: Light scratches in this matte finish can be buffed out with a medium Scotch Brite pad. After scratches are removed, simply wipe down with soap and water then towel dry to eliminate water spots.

OPAQUES, GRANITES, TRANSLUCENTS, CRYSTALLINE, QUARTZ ROX & WOODLANDS: Light scratches in this gloss finish can be buffed out with a white Scotch Brite pad, or wet sanded with 2000 grit sandpaper. After scratches are removed, simply wipe down with soap and water then towel dry to eliminate spots.

CAST ALUMINUM CARE

Clean with mild soap and water. For any wear in the lacquer finish spray with Rustoleum Clear Exterior Lacquer.

CAST IRON CARE

Wipe clean with a damp cloth, very mild soap and water.
